## FIXED & ADAPTED COLLECTION POINT

We offer 20 fixed points of supply food throughout the course, 1 every 3.5km or so, which is a visible and adapted collection of waste. A selective sorting system has been in place since the beginning of this great adventure, with the support of Sydetom66 : Expert in the collection, treatment and recovery of waste.

In parallel, we have set up runners teams, called "Green Team", which ensures the respect of our values, even within the events.

Besides, for the sake of continuous improvement, we quantify waste by identifying the number of bags discarded as waste and recycling per item. Thus, we can work on axes aiming to reduce as much as possible the quantities generated, in future editions.

## CHARTER : "JE SWIMRUN ÉCO-RESPONSABLE"

Under the inspired initiative of 18 Spring (sustainable communication society), we have introduced the "Je Swimrun Eco-responsible" charter. Thus, during the briefing, each of the participants signs, the Charter by affixing its signature to the permanent marker. More than just reading, it's a real physical commitment.
